2. Module Objective

3. Module Topics

4. 1.1 Overview

5. 1.2 High-level View

6. 1.3 Time Series Database (TSDB)

7. 1.3.1 Why TSDB

8. 1.3.2 Few TSDB Available in Market

9. 1.3.3 What Needs to be Monitored

Module 3: Infrastructure Monitoring

Module Objective

At the end of this module, you will be able to:

- Explain what is infrastructure monitoring
- Identify the components of monitoring and the metrics
- Differentiate the agent vs. agentless monitoring, reactive vs. proactive monitoring and cloud vs. on-premise monitoring
- Explain network and security aspects of monitoring
- List the challenges in infrastructure monitoring
- List the available tools for infrastructure monitoring

Module 3: Infrastructure Monitoring

What did You Grasp?

Monitoring of hardware systems is known as

- A) End user monitoring
- B) Infrastructure Monitoring
- C) Application monitoring
- D) Log Monitoring

Module 3: Infrastructure Monitoring

1.4.1 Monitoring Components

Various monitoring components are:

Program details

Data collection plan

Monitoring plan

Evaluation plan

How the plan will be used

14. What did You Grasp?

Module 3: Infrastructure Monitoring

1.5 Agent vs Agentless Monitoring

There are two ways of collecting data for monitoring:

- Agent based
- Agent less

25. What did You Grasp?

Module 3: Infrastructure Monitoring

1.9 Infrastructure Monitoring Challenges

The following are the challenges in infrastructure monitoring:

Create modern monitoring
for modern environments

Develop customised
dashboards and
visualisations

Instil a culture of visibility

Achieve greater efficiency
and scale
